

**Don't wait for the next weather outbreak. Be informed. Be prepared. Sign up today at [alabamasaftnet.com](http://alabamasaftnet.com)**

Alabama SAF-T-Net is the no-cost weather alerting system for all residents of Alabama. When severe weather threatens and time is of the essence, Alabama SAF-T-Net specifically informs you if any of your chosen locations are in the path of a storm. The system sends "dangerous storm" alerts from Baron Services, as well as National Weather Service tornado, severe thunderstorm and flash flood warnings, to your mobile device, email account or landline phone. Simply choose up to four addresses within the state, like where your spouse works or your children go to school, and Alabama SAF-T-Net will send you an alert when severe weather approaches any of these locations.

**Is your family ready for severe weather season?**

## New Homes Program

*The best time to install energy efficiency within a home is during construction.*

Huntsville Utilities works with area builders to develop a pre-construction plan for energy efficiency. *Energy Star & Energy Right* certifications are also provided by participating builders through Huntsville Utilities. Email [energy@hsvutil.org](mailto:energy@hsvutil.org) for more information

## Efficiency Program

*In most homes, energy used to heat and cool account for the largest share of utility costs.*

Huntsville Utilities offers information, a list of quality contractors, and a free inspection to those who wish to replace their central heating and cooling equipment.

A list of participating contractors is available by email.

## Generation Partners

*Electricity generated by our community*

The "Generation Partners Program" encourages the production of electricity by Huntsville Utilities' customers. A premium rate is paid by TVA through Huntsville Utilities for generation through solar and or wind. Information packets available by e-mail.

## Home e-Valuation Surveys

*Do you know where your energy dollars are being spent ?*

Do-it-yourself energy surveys yield a report based on information from your actual energy account. Surveys are completed by homeowners and mailed back for processing.

Additional envelopes or postage are not needed.

Request your Home e-Valuation survey by email.
