

HUNTSVILLE UTILITIES

ELECTRICITY • NATURAL GAS • WATER
RELIABLE & EFFICIENT

SAFE • RELIABLE • HIGH-QUALITY WATER

Huntsville Utilities' new Water Treatment Plant will ensure water is available for decades to come!

- Estimated startup time: Late Spring 2017
- Initial capacity: 12 million gallons a day
- Maximum available capacity: 96 million gallons a day

The new water treatment plant will improve service to the Big Cove/Hampton Cove areas as well as increasing capacity available to the entire Huntsville Utilities water system. At maximum capacity, the plant will double the amount of water available to Huntsville Utilities' growing customer base.

HU's Water System has been recognized by the Environmental Protection Agency (EPA) and the Alabama Department of Environmental Management (ADEM) for superior water quality and service. You can read more in the 2016 Annual Water Quality Report recently mailed to all water customers and available online at <https://www.hsvutil.org/hu-hub/publications/>.
